**IN THE CLAIMS:**

Please amend the claims as follows:

9. (Amended) A process for production of a highly aromatic wort comprising the steps of:
- G*  
*C12*
- (1) adding a product according to claim <sup>1</sup>/<sub>3</sub> to a wort which is being boiled, wherein the product is added while boiling [during the step of] the wort [boiling]; and
- (2) further boiling the wort containing the above-mentioned product for at least 4 minutes.

11. (Amended) A process for production of a highly aromatic wort comprising the steps of:
- C3G*
- (1) adding a product according to claim <sup>1</sup>/<sub>3</sub> to a wort after the wort has been boiled, wherein the product is added [boiling] during a [the] whirlpool rest step; and
- (2) maintaining the wort containing the product at a temperature of at least 95°C for at least 10 minutes.

Attorney's Docket No. 001560-223

---

15. (Amended) A process for production of a highly aromatic wort comprising the steps of:

- C4
- (1) extracting hops with a supercritical or subcritical carbon dioxide solvent to obtain a carbon dioxide extract and a hop extract residue;
  - (2) separating a hop extract from the carbon dioxide extract;
  - (3) mixing the hop extract and the hop extract residue to obtain a product;
  - (4) adding the product from step (3) to a wort which is being boiled,  
wherein the product is added while boiling [during] the wort [boiling]; and
  - (5) further boiling the wort containing the product for at least 4 minutes.
- 

17. (Amended) A process for production of a highly aromatic wort comprising the steps of:

- C5
- (1) extracting hops with a supercritical or subcritical carbon dioxide solvent to obtain a carbon dioxide extract and a hop extract residue;
  - (2) separating a hop extract from the carbon dioxide extract;
  - (3) mixing the hop extract and the hop extract residue to obtain a product;
  - (4) adding the product from step (3) to a wort which has been boiled,  
wherein said product is added after boiling [after] the wort [boiling] during a [the] whirlpool rest; and
  - 5) maintaining the wort containing the product at a temperature of at least 95°C for at least 10 minutes.
-
